

UPGRADE YOUR EQUIPMENT. UPGRADE YOUR BUSINESS.

KEY BENEFITS

PARTICIPATING IN THE RETROFIT PROGRAM WILL RESULT IN:

- Up-to-date equipment and technology
- Increased efficiency and productivity
- Immediate operational savings
- Decreased maintenance costs

ADD POWER TO YOUR BUSINESS BY **USING LESS OF IT.**

Upgrading old equipment has never made more sense. With incentives from Save on Energy's Retrofit program, you can reduce your upfront investment and control your ongoing costs.

The Save on Energy Retrofit program provides various options allowing you to find the right project for your business. Get started today and find more ways to save.

RETROFIT PROGRAM

WHAT TYPES OF PROJECTS ARE ELIGIBLE?

Projects that are eligible under the Retrofit program are those that provide sustainable, measurable and verifiable reductions in peak electricity demand and electricity consumption.

THESE UPGRADES CAN INCLUDE:

- Lighting and controls
- HVAC
- VFD
- Compressed air
- Building automation
- Chillers
- Refrigeration
- Heat Pumps
- Ventilation systems
- Fans
- Pumps
- Motors
- Unitary AC

Visit [SAVEONENERGY.CA/RETROFIT](https://www.saveonenergy.ca/retrofit) to see a full project list.

ABOUT THE PROGRAM

Under the Retrofit program, there are two types of project applications available: **PRESCRIPTIVE TRACK** and **CUSTOM TRACK**.

→ PRESCRIPTIVE TRACK

Prescriptive track applications are ideal for quick system upgrades as applications are easy to complete and have faster review turnarounds.

Incentive amounts for lighting and other measures are based on predefined amounts per unit of product.

The minimum eligible application incentive amount is \$500.

→ CUSTOM TRACK

Custom track applications are designed to provide flexibility for more comprehensive projects, with opportunities for increased energy savings. Incentives are based on energy savings over pre-project baselines.

The minimum eligible application incentive amount is \$1,500.

To participate, your application must be submitted before engaging in any binding agreements. All incentives are capped at 50 per cent of project cost.

SEE HOW YOUR COMPANY CAN GAIN AN EDGE.

This hotel uses **85% less electricity** to light its lobby after an upgrade.

This factory **saves 25% on its annual electricity use** with upgrades to lighting, compressors, and HVAC.
