

Making things easy

Get the most out of **SMARTLINK** as part of a Total Responsibility Plan. Step back, relax, and let our service engineers perform their magic behind the scenes. Just like healthcare specialists, we monitor the vital signs of your compressed air equipment. We know exactly when to service your machines, and if an issue is developing, we will spot it from miles away, diagnose its cause and be there on time to fix it.

Experience the next level of service

SMARTLINK insights make us better at supporting you. Efficient service planning and parts handling give you more hours of machine uptime. Product design improvements, identified with the help of field data, take the reliability of your compressed air system to the next level.

SMARTLINK. Connecting you to an easier life.

Atlas Copco

SMARTLINK connects you to an easier life.

SMARTLINK captures live data from your compressed air equipment and translates them in clear insights. At a glance, you can check uptime, energy efficiency and machine health.

Energy efficiency

SMARTLINK offers easy follow-up of the energy consumption of your compressed air installation. Get a quick overview on the dashboard or delve deeper into customized reports.

Uniquely based on the actual working conditions of your machines, recommendations present real opportunities to improve the efficiency of your air system.

Save up to

30% with improved energy efficiency
(70% of the money you spend on your compressor is on energy)

Uptime

Are your compressors up and running as they should? A quick glance at the **SMARTLINK** dashboard will tell you.

If an issue comes up, **SMARTLINK** prompts you to take action. An early response is the best way to avoid unexpected downtime! If you have a TotalCare or Total Responsibility Service Plan, Atlas Copco will proactively fix the problem for you.

Increase your uptime with

3% by having your compressors
under a service contract with **SMARTLINK**

Overall health

Ensuring your machines are in good shape AND will stay that way: isn't that what it's all about? **SMARTLINK** tracks all the vital signs of your compressed air equipment and makes them available to you, anywhere, anytime. For your machines, staying in shape means on-time service. The service timeline shows you the service needs of every machine, planned visits and clear service reports.

Actively monitoring more than

30 data points via **SMARTLINK** will help you
to improve the health rate of your compressor

Choose your service level: **SMARTLINK ENERGY**

- Analyze and optimize the energy efficiency of your compressor room
- A must for ISO50001 compliance
- Performance indicators, benchmarks and trends
- Easy access to reports and recommendations

Diagnostic Supervision

This option enables us to spot and fix any deviations at an early stage. Based on smart algorithms and our expert analysis, proactive troubleshooting keeps your energy efficiency at its top level.

Choose your service level: **SMARTLINK UPTIME**

- Get maximum availability of all connected machines
- Early warnings and recommendations
- Alerts sent to your computer or smartphone
- Easy follow-up of machine health

Integrated Bearing Condition Monitoring

The Shock Pulse Monitoring (SPM) option keeps an eye on critical components and warns you when they need to be replaced. Avoid a disruption of your production and get maximum equipment lifetime.

Choose your service level: **SMARTLINK SERVICE**

- Free for all customers
- Consult machine status and service needs
- Recommendations for real improvements
- Easy access to service and advice

Total Responsibility

With a Total Responsibility Service Plan, we take complete care of your compressed air equipment. On-time maintenance by service experts, genuine parts, upgrades, overhauls, full risk coverage: it all contributes to optimal machine health and reduced overall costs.
